

JUMPING FROG

traditional

Use a small rectangle of stiff paper ; A 3" by 5" file card is just right.

1. Fold in half length-wise. Unfold.

2. Bring top edge to side edge. Unfold.

3. Bring top edge to side edge. Unfold. Turn it over.

4. Bring top edge down to place where diagonal creases reach sides. The fold will pass through the point where the diagonals cross. Unfold. Turn it over.

5. Push in the center of paper where all the creases intersect. The edges will fold up on the prepared lines. Push the sides inward and the top down on top of them. Press flat.

6. Fold the little flaps in half upward. They will become the front legs. (This triangles with four flaps is called the "water-bomb base" and is used to make many origami models.)

7. Bring side edges to meet at the center crease.

8. Fold front leg flaps in half downward and outward.

9. Bring bottom edge to tip of nose.

10. Fold upper flap in half downward. Turn it over.

11. Finished Frog. Push down on rear edge. As finger slips off, Frog jumps. Can you make her jump into a box?
